

Gebrauchsinformation / Specialist Information

Important Information.

1. Introduction

Recent scientific research has shown Placenta HP contains rich growth factors, hormones, proteins, glycosaminoglycans, nucleic acids, polydeoxyribonucleotides (PDRNs, antibodies, and other concentrated nutrients that can rejuvenate organic tissue. It is rich in over 128 growth factors including HGF, NGF, EGF, FGF, CFS, IGF-1, TGF, IL1, IL2, IL3, and IL4. Mitogenic actions of cytokines from placenta show an array of physiological effects – anti-inflammatory, regulation of autonomous nerve system, improvement of circulation, wound tissue healing, inhibition of protease, enhancement of nerve regeneration, balancing multiple hormone levels, immune boosting (anti-allergic), analgesic effect, and the improvement of intestinal environment.

Placenta HP is a safe therapeutic agent with potent regenerating activities on all human tissue. When introduced into humans (internally), it can reinforce deteriorating cells and hence bring back or restore their youth.

2. Composition

MFIII of Switzerland HP 230mg of highly concentrated Placenta prepared using a **patented** hightech extraction technology. Extraction is a common pharmaceutical technology used to isolate peptides, proteins, enzymes or cytokines, growth factors, hormones, and other compounds which are essential substances for elderly and/or ill organisms. The extraction and processing of tissue is done **without** denaturing sterilization nor any chemical additives.

3. Properties

MFIII of Switzerland HP 230mg, with most of its active and specific components (peptides, proteins, enzymes, cytokines, hormones, growth factors and others), works as a substitute in elderly and ill organisms. This substitution may lead to restoration or regeneration and revitalization.

4. Benefits of MFIII PLACENTA HP®

As a therapy for revitalisation and rejuvenation, **MFIII PLACENTA HP®** has a number of benefits aside from managing the effects of aging. Some examples are:

- Regenerates cells, tissues, and organs
- Increases flexibility in joints and discs
- Improves immune system against diseases
- Improves alertness and mental awareness
- Lightens facial pigmentation
- Refines facial pores and a glow to your skin
- Improves skin elasticity and thickness; enhances skin texture
- Improves Sleep patterns
- Improves in blood circulation
- Enhances stamina and energy level
- Renews sexual satisfaction
- Eliminates constipation
- Decreases pre-menstrual tension and related feminine problems
- Reduces pre-menopause syndrome and a delay in menopause
- Firms sagging bust and develops bust in cases of women with under developed bust size
- Stabilises weight to a normal level
- Decreases serum concentrations of cholesterol and triglycerides
- Decreases risk of heart disease
- Relieves symptoms related to any chronic disease
- Increases vigour and energy

5. Indications

Skin complexion improvements, wound healing, degenerative and chronic diseases of the heart, liver, lungs, as well as of the central nervous system, premature aging and loss of vitality, angiopathies and peripheral circulatory disturbances, impairment of glandular function, chronic degenerative disease of the connective tissue system, disturbed development in childhood, and immunological insufficiencies.

6. Dosage and Administration

A set of 50 vials are administered per course of treatment. 5 days a week are recommended. For sensitive patients it is possible to reduce the number of treatments to alternate days or 3 days a week. A repetition of the treatment cycle after 6 and 12 months is possible depending on the illness and the individual patient's health. A deep, subcutaneous or intramuscular injection on the Gluteal Area with a thin needle should be given.

7. Recommended Dosage

1 or 2 vials each time in daily or alternate days or 2 x 2 vials every alternate days. (Max: 12 vials each week) There is no over Dosage for our placenta extracts.

8. Temporary Side Effects

In case of reddening and swelling at the injection site, cold compresses and repeated, gentle application of a heparin ointment to cool locally and/or reduce the redness should be sufficient. An increase in temperature might occur for a brief period. The risk of abscesses is small.

9. Contraindications

MFIII of Switzerland HP 230mg is contraindicated in cases of specific allergic disposition and in the stage of all infectious diseases. With allergic disposition, prophylaxis with an antihistamine, calcium and/or cortisone at least 10-15 minutes before injection is advisable.

10. Endosed Packages Sizes of:

1 x 50 x 2ml (human placenta extracts).

11. Shelf Life

4 years from date of manufacture in original enclosed state.

12. Quality Control in Finished Products

Monitored closely and in adherence to International and European sanitary standards.

13. Storage

Do not expose to heat or sunlight. Keep out of reach of children.

Manufactured in the European Union and Licensed by:

Laboratoires Dom-AVMM Biotechnologies Sarl
Leutschenbachstrasse 95, 8050 Zürich, Schweiz-Suisse-Switzerland.
(Swiss Reg.-Nr. CH-170.4.004.840-4)
